Eyeletting Plier

No. **536**

Please note

that our **Eyeletting Plier No. 536**, fitted with punches No. 3 for 8-mm. brass eyelets, may suitably be used to make coupling eyes for low-tension conductors.

The wire is twisted round the eyelet which is pressed together with the plier.

The soldering (which is not necessary in this case, however) can easily be done, if wanted, after the eyelet has been pressed together.
